The Tao of Sustainability

A strategy framework for recovering the lost domains of consciousness

The Natural Domain

The Human Domain

Sustainability

If the human dimensions of sustainability are not addressed first, nothing much will happen!

© John Ehrenfeld 2009

Design is a deliberate process to bring forth one's vision of the world.

Some Thoughts for Industrial Ecology

International Society
for Industrial Ecology

1. Continue to contribute to the reduction of unsustainability.
2. Add to the interdisciplinarity of the field.
3. Enlarge the place of complexity in the intellectual base.
4. Make adaptive management an explicit area of study and practice.
5. Put the ideas to work in small-scale social (real-world) experiments.
